

Immatics Biotechnologies GmbH, based in Tuebingen and Martinsried (Munich), Germany, is an independent and highly innovative biopharmaceutical company. Based on its XPRESIDENT® technology for the identification of novel tumor-associated peptides, Immatics is actively developing novel cancer immunotherapies including Adoptive Cell Therapies, T-cell receptor and antibody bispecifics as well as cancer vaccines. For additional information please visit [www.immatics.com](http://www.immatics.com).

We are currently seeking a

## **(Senior) Scientist Preclinical Pharmacology (f/m)**

to support our team to develop innovative immunotherapeutic products. You will work in Tuebingen in an interdisciplinary environment with colleagues from target discovery and clinical development, business development and intellectual property. Your analytical reasoning and action-oriented style as well as your organizational skills will contribute to the team's success.

Your main responsibilities will include but are not limited to the following tasks:

- Discovery and preclinical assessment of novel cancer immunotherapeutics
- Planning, supervision and reporting of in-house *in vitro* studies for preclinical assessment of bispecific molecules
- Scientific coordination and monitoring of *in vitro/ in vivo* research activities performed at contract laboratories
- Writing and reviewing of standard operating procedures and establishment of study protocols
- Contribution to the filing of regulatory documents and patents
- Interaction with project teams and external partners with regard to pharmacological questions

### **Your profile:**

You hold a PhD degree in life sciences and have 3+ years of relevant industry experience in the development and preclinical assessment of biologics or small molecule drugs. You have a proven track record and hands-on experience in experimental *in vitro* and *in vivo* pharmacology. You have in-depth understanding of cell biology and immunology, ideally in the context of cancer therapy. Further experience in cell-based cytotoxicity assays, multicolor flow cytometry or multiplex cytokine analysis is of advantage. You are able to lead a small lab team and have a desire to continue in a laboratory-focused role.

We expect a high degree of independent working and analytical reasoning. You have excellent communication skills, both in English and German, and you are familiar with the requirements of commercial business and interaction with external partners. You are conversant with the establishment of quality assurance systems and you take careful editing and documenting of your results for granted. You embrace rapidly changing requirements with an open mind and show a high degree of flexibility in an environment which is marked by a constant striving for excellence. Your motivation is driven by your dedication to innovation and science. You approach tasks in a structured, reliable and foresighted manner, combined with a high level of individual responsibility, enthusiasm and strong social skills.

### **Our offer:**

We are a committed and inspired team and cherish the collegial, highly motivated and family-friendly atmosphere within Immatics. Our culture allows for a high level of originality, independent thinking and initiative.

If you're interested in working for Immatics, please apply [online](#) and provide your application documents along with the relevant credentials and certificates. Mrs Annemarie Selbenbacher will answer initial questions at +49 89 125 03 98 33 (landline number Germany). Constares GmbH (Mrs Annemarie Selbenbacher) advises Immatics on this job posting.
