

# DELIVERING THE POWER OF T CELLS TO CANCER PATIENTS

Immatics combines the discovery of true targets for cancer immunotherapies with the development of the right T cell receptors with the goal of enabling a robust and specific T cell response against these targets. This deep know-how is the foundation for our pipeline of Adoptive Cell Therapies and TCR Bispecifics as well as our partnerships with global leaders in the pharmaceutical industry. Operating from Tuebingen, Munich and Houston, we are committed to delivering the power of T cells and to unlocking new avenues for patients in their fight against cancer. For more detailed information, visit [www.immatics.com](http://www.immatics.com).

We are currently seeking a Full Time **Senior QC Analyst** with emphasis on Microbiology and Safety Methods for our **Quality Control** to support our team. This position will work in Houston, Texas **and will be responsible for final release testing, assisting in implementing new microbiology methods, and mentoring junior analysts. This is a senior level position where we expect the individual to help improve and develop systems to help the QC department grow in the microbiology area, but the individual would be trained in other methods used in Cell therapy such as flow cytometry.**

**The main responsibilities of this position will include but are not limited to the following tasks:**

- To perform release assays for cell identity and safety, which includes the use of different methods such as visual inspection, ELISA, and PCR. Including performing visual inspection of final product and microbial sample.
- Transport of samples between manufacturing facility and the QC laboratory.
- Familiar with microbiology techniques such as environmental monitoring, sterility assays using BACT-Alert, sub-culturing, and identification.
- Familiar with endotoxin and mycoplasma testing.
- Familiar with and performs calculations to determine cell viability, dilutions and cell concentrations.
- Responsible for aseptic handling of reagents and products.
- Performs procedures and maintains accurate documentation in compliance with Standard Operating Procedures and appropriate federal and local regulations.
- Performs routine equipment maintenance and troubleshooting.
- Handling of human peripheral blood in a safe manner.
- Manages, in collaboration with other team members. supply inventory.
- Maintenance of data integrity and logs for equipment, including the review of the logs.

**The qualifications for this position include, but are not limited to the following:**

- **REQUIRED:** Bachelor's Degree in science
- **PREFERRED:** 5 or more years of experience in a QC environment.
- Have experience writing Out of specification investigations, deviation report, and change controls.
- Strong technical problem-solving skills.
- Ability to handle multiple tasks concurrently and in a timely fashion.
- Ability to communicate effectively with supervisors and peers.
- Lifting up to 40 lbs.
- Standing/sitting for long periods of time.
- Indoors but in laboratory setting.
- Potential loud noise.
- Good Vision to perform experiments and analyze results.
- Having reliable transportation.

We expect a high degree of independent work, analytical reasoning and excellent communication skills. You embrace rapidly changing requirements with an open mind, think outside the box and show a high degree of flexibility in an environment which is marked by a constant striving for excellence. You approach tasks in a structured,
