

DELIVERING THE POWER OF T CELLS TO CANCER PATIENTS

Immatics combines the discovery of true targets for cancer immunotherapies with the development of the right T cell receptors with the goal of enabling a robust and specific T cell response against these targets. This deep know-how is the foundation for our pipeline of Adoptive Cell Therapies and TCR Bispecifics as well as our partnerships with global leaders in the pharmaceutical industry. Operating from Tuebingen, Munich and Houston, we are committed to delivering the power of T cells and to unlocking new avenues for patients in their fight against cancer. We are currently seeking a

Scientist Cell Line Management (all genders welcome)

to support our Sample & Cell Line Management Team. You will work in Tübingen (Germany) in an interdisciplinary environment with colleagues from all research and preclinical/ clinical development departments. Your analytical reasoning and action-oriented style as well as your organization and communication skills will contribute to the team's success.

Your main responsibilities will include but are not limited to the following cell line management tasks:

- **Cell culture:** You will contribute to the planning, coordination, and supervision of our cell culture lab activities. You will be responsible for cell line characterization by **flow cytometry**. With your previous experience in **single cell isolation and purification** techniques, you will take the lead in our routine blood cell isolation protocol as well as contribute to the development of new methods to answer target-specific questions. Thorough documentation compliant with QM requirements and presentation of deliverables to internal and external stakeholders will equally be part of your responsibilities.
- **Cell line banking:** You will be responsible for **cell line selection** for target validation activities as well as for **cell line procurement**. You will maintain a well-documented overview of our in-house cell line storage and cell line-associated data. You will continuously strive to improve the running processes and to further promote the development of **cell line related concepts** in the in-house **database**.
- **Cell line project management:** With your experience in generating **stable cell lines and single cell cloning**, you will successfully manage our running cell line projects with external cell line service providers by ensuring that the timelines and quality requirements are met. You will continuously assess the need for cell lines or cell-based models in close collaboration with process owners throughout different departments.

Your profile

You hold a PhD degree in Life Sciences, Biotechnology, Medicine, Pharmacy or have been comparably educated and you have proven your scientific excellence. Ideally, you have gained insights into the various approaches of cell line model-based validation of targets for (cancer) immunotherapy. Hands-on experience in genetic modification of cell lines (i.e., transfection/ transduction), single cell isolation and purification techniques (e.g., MACS), and flow cytometry is desirable. Knowledge of immunology and/ or oncology would be a plus. Your excellent communication skills enable you to successfully contribute to interdisciplinary projects as a part of our team. You are interested in translating scientific findings into clinical applications and you take careful processing and documenting of your results for granted.

We expect a high degree of independent working, analytical reasoning, and excellent communication skills in English. You embrace rapidly changing requirements with an open mind, think outside the box and show a high degree of flexibility in an environment which is marked by a constant striving for excellence. Your motivation is driven by your passion for innovation and science. You approach tasks in a structured, reliable, and foresighted manner, combined with an elevated level of individual responsibility, enthusiasm, and strong social skills.

What we offer

We are a committed and inspired team and cherish the collegial, highly motivated, and family-friendly atmosphere within Immatics. Our culture allows for a high level of originality, independent thinking, and initiative. We believe in supporting our employees' professional and social skills: We enable them to join conferences and trainings as well as to enjoy our Immatics benefits – e.g., job bike, job ticket, Health Programs, childcare benefits, relocation allowance, Company summer and winter events.

If you are interested in working for Immatics, please apply [online](#) and provide your application documents along with the relevant credentials and certificates. CoreDi Recruiting GmbH advises Immatics on this job posting; Mrs. Rebecca Schön will answer initial questions at +49 89 1241 46 204.
