

# DELIVERING THE POWER OF T CELLS TO CANCER PATIENTS

Immutics combines the discovery of true targets for cancer immunotherapies with the development of the right T cell receptors with the goal of enabling a robust and specific T cell response against these targets. This deep know-how is the foundation for our pipeline of Adoptive Cell Therapies and TCR Bispecifics as well as our partnerships with global leaders in the pharmaceutical industry. Operating from Tuebingen, Munich and Houston, we are committed to delivering the power of T cells and to unlocking new avenues for patients in their fight against cancer. For more detailed information, visit [www.immutics.com](http://www.immutics.com).

We are currently seeking a

## Scientist TCR Bispecifics (all genders welcome)

to support our team dedicated to the discovery and validation of bispecific T cell engaging receptor (TCER<sup>®</sup>) molecules. You will work in Tübingen (Germany) in an interdisciplinary environment with colleagues from all research and development departments. Your analytical reasoning and action-oriented style as well as your organization and communication skills will contribute to the team's success.

Your main responsibilities will include but are not limited to the following tasks:

- Analysis and evaluation of binding interactions of bispecific TCER<sup>®</sup> molecules and antibody-based bispecifics directed against peptide:HLA targets
- Characterization of efficacy and selectivity parameters of bispecific TCER<sup>®</sup> molecules and antibody-based bispecifics and validation of their mode-of-action using different *in vitro* assay systems
- Professional leadership and management of lab operations and staff
- Scientific interaction with leaders of internal and external projects and support of Quality Management including generation and review of Standard Operating Procedures

### Your profile

You hold a PhD degree in life sciences. Ideally, you have gained insights into functional characterization of protein therapeutics including affinity measurements via bio-layer interferometry or alternative technologies. Knowledge in immunology or oncology is an advantage. Your competence and experience and your excellent communication skills enable you to successfully contribute to developing cancer immunotherapies. You are interested in translating science into clinical applications, and you take careful processing and documentation of your results for granted.

We expect a high degree of independent working, analytical reasoning and excellent communication skills in English. You embrace rapidly changing requirements with an open mind, think outside the box and show a high degree of flexibility in an environment which is marked by a constant striving for excellence. Your motivation is driven by your passion for innovation and science. You approach tasks in a structured, reliable and foresighted manner, combined with an elevated level of individual responsibility, enthusiasm and strong social skills.

### What we offer

We are a committed and inspired team and cherish the collegial, highly motivated and family-friendly atmosphere within Immutics. Our culture allows for a high level of originality, independent thinking and initiative. We believe in supporting our employees' professional and social skills: We enable them to join conferences and trainings as well as to enjoy our Immutics benefits – e.g. job bike, job ticket, Health Programs, childcare benefits, relocation allowance, Company summer and winter events.

If you're interested in working for Immutics, please apply [online](#) and provide your application documents along with the relevant credentials and certificates. Coredi Recruiting GmbH advises Immutics on this job posting; Mrs. Rebecca Schön will answer initial questions at +49 89 1241 46 204.
