

# DELIVERING THE POWER OF T CELLS TO CANCER PATIENTS

Immatics combines the discovery of true targets for cancer immunotherapies with the development of the right T cell receptors with the goal of enabling a robust and specific T cell response against these targets. This deep know-how is the foundation for our pipeline of Adoptive Cell Therapies and TCR Bispecifics as well as our partnerships with global leaders in the pharmaceutical industry. Operating from Tuebingen, Munich and Houston, we are committed to delivering the power of T cells and to unlocking new avenues for patients in their fight against cancer. For more detailed information, visit [www.immatics.com](http://www.immatics.com).

We are currently seeking full-time a

## (Senior) Project Manager (all genders welcome)

to strengthen our Translational Development and Project Management team in the research and development of innovative immunotherapeutic products. You will work in Tübingen or Munich (Germany) in an interdisciplinary environment with colleagues from R&D as well as various other departments across the Company. Your analytical reasoning and action-oriented style as well as your organization and communication skills will contribute to the team's success.

Your main responsibilities will include but are not limited to the following tasks:

- **Scientific project management:** With your experience in project management, organizational skills, and scientific knowledge you will lead interdisciplinary research and development teams to successfully achieve the project goals on time and on budget. You will coordinate the cooperation of all departments involved – in Germany as well as in the US – and you will provide the interface with international, external partners in research collaborations.
- **Translational Science:** With your scientific capabilities you will contribute to optimize the development of early research programs and their transition into clinical development. You will independently research a wide range of topics based on scientific literature and support the preparation of clinical and regulatory study documents.

### Your profile

You have successfully completed your doctorate in the field of life sciences, medicine, pharmacy, or a comparable education and have proven your ability to organize complex projects using established project management approaches and tools. Ideally, you have already some industry experience and gained insights into the preclinical and/ or clinical drug development, preferably of biologics. Experience in immunology, oncology and/ or cell and gene therapy are an advantage. Your project management and scientific skills and your excellent communication skills will enable you to successfully manage interdisciplinary projects and to advance collaborations with international partners from the pharmaceutical and biotech industries.

You see your personal challenge in managing cross-functional projects and teams to facilitate the translation of scientific findings into clinical applications that matter for patients. Based on your scientific expertise and background, you are eager to address R&D tasks with the experts, to develop concepts, to present them convincingly and to realize them with interdisciplinary teams.

For your day-to-day activities, we expect a high degree of independent work, analytical thinking, and communication skills. Careful preparation and documentation of your results, also in very good English, are perfectly natural for you. You are open to dynamically developing requirements and demonstrate a high degree of flexibility. You enjoy working in an environment where excellence is a constant requirement. Your motivation is driven by your passion for innovation and science. You convince through your structured, reliable, and forward-looking approach, your high level of personal responsibility, enthusiasm, and distinct social competences.

### What we offer

We are a committed and inspired team and cherish the collegial, highly motivated and family-friendly atmosphere within Immatics. Our culture allows for a high level of originality, independent thinking and initiative. We believe in supporting our employees' professional and social skills: We enable them to join conferences and trainings as well as to enjoy our Immatics benefits – e.g. job bike, job ticket, Health Programs, childcare benefits, relocation allowance, Company summer and winter events.
